

An Illustrative groff documentation

Anuj Nair

Introduction

In the last video, we talked about basic formating, including titles, sections and bold and italics commands as well as basic documentation options. Now we'll not only learn a couple more commands, but we'll talk about creating custom macros.

Formating

We can do some more formating here. The last word of this sentence is (**bold**). One thing we can do is underline text. Is create boxed text

Macros

- This is a list item
- Here is another
- and another.

Here's is a break

- This is a bulleted item
- here is another
